

# Tuesday's Child

*A Program For Building Happy Families*

## At Tuesday's Child parents learn:

- ◇ *how to handle temper tantrums, hitting, and sibling fights.*
- ◇ *how to successfully manage daily routines including mealtimes and bedtimes.*
- ◇ *how to prepare children for success in school.*

## At Tuesday's Child children learn:

- ◇ *the ability to interact appropriately with others.*
- ◇ *the ability to focus and concentrate.*
- ◇ *the ability to recognize limits and follow directions.*

***Parents and Children Experience Positive  
Change At Tuesday's Child***

## Our History

Tuesday's Child originated in 1980 at Chicago's

Children's Memorial Hospital as a family service developed by mental health care and early education specialists to help families of young children who had conflict-ridden relationships with their parents. Many of these children also had significant emotional/behavioral difficulties or developmental disorders. In 1984 Tuesday's Child was established as an independent 501 c(3) nonprofit organization.

## Our Mission

The mission of Tuesday's

Child is to help families establish and maintain strong, positive relationships with their children from the earliest stages and to help children, especially those at risk for failure, to enter school ready to learn.

## Our Vision

- ◇ That all parents will help their children recognize and achieve their highest potential.
- ◇ That every child will approach life with a strong sense of importance for family and community...
- ◇ And that the parenting and early childhood programs can serve as a strong model for national education policy, and social and school programs.

## Programs

### The Parenting Program

Parents work on individualized behavioral and goal planning activities, with group sessions led by a Clinical Child Psychologist, and individual time with trained peer parent mentors. Both weekday and Saturday programs are available to address the needs of single parents, co-parenting situations, and the problems parents face when each parent is working full time.

### The Child Center

The Child Center compliments the parent education programs by using the same developmentally appropriate, behavior management strategies taught to parents. Emphasis is placed on cooperating with the teacher, interactive games with peers, and play. The four areas of concentration emphasized and observed in the Child Center are:

- ◇ *Socialization:* ability to interact appropriately with others
- ◇ *Time on Task:* ability to focus and concentrate
- ◇ *Participation:* ability to cope with a variety of situations
- ◇ *Compliance:* ability to recognize limits and follow directions

**For More Information or to Schedule an Intake Appointment, Please Call 773.282.5274.**

## Additional Services

### Early Intervention: Birth to Three

Specialized onsite intervention of young children with diagnosed developmental delays such as speech, physical and social/emotional issues. Intensive parent training is also provided.

### Familias Felices

A Spanish-language parent training program combined with Spanish-language Child Center activities for children.

### Outreach Program

Parent and provider training is offered at community organizations in workshop formats. These programs are offered in multi-week or one-day sessions in Spanish and English.

### Summer Camp

The Camp provides children with the opportunity to experience field trips and camp settings while continuing to offer intervention and behavior management.

### Speech Therapy

One-on-one therapy for children who are exhibiting signs of speech or language delays.

### Complete Diagnostic Assessments

Full evaluations by experienced clinical staff to determine a child's risk for developmental delays.
